WHAT THE WEST THINKS OF WHEN WE SAY KONG

The basic tool for the manipulation of reality is the manipulation of words. If you can control the meaning of words, you can control the people who must use the words.

of the United States government—the Committee on Public Information, usually known by the name of its chairman, George Creel—was the "Creel Committee." This was actually an emergency wartime department of the government. It was set up by order of the President and was financed out of his special war funds, later supplemented by congressional appropriations. The Creel Committee organized both domestic and foreign propaganda. (There was no War Department or General Staff agency charged with the military side of psychological warfare.) Coordination was effected by Mr. Creel himself; he had close access to the President and to the appropriate cabinet members.
